Personnel Downloader (PDL)

What is
Personnel Downloader?

Features & Security

Personnel Downloader (PDL)

You have choices:

- HR Report Selector
 - Predefined reports
 - Variety of selection criteria
 - “It is what it is”!
- Personnel Downloader
 - Easier than HR Query to use, as long as the fields you need are available
 - No account selection
 - Fixed output data; cannot sort output data
 - Retrieved data can be saved for reuse
- HR Query
 - Most fields are available
 - Can select accounts
 - Can reformat output data; can sort output data
 - Allows “find” using a specific character string
 - Cannot save retrieved data

Personnel Downloader (PDL)

Application Features

- A tool to select data from the database and create a comma/tab separated file which can be imported into 3rd party applications such as Excel
- Easy navigation between categories, download definitions and data files
- Drop down list integration of setup values
- Fields categorized for easy access

Personnel Downloader (PDL) Application Features

- Immediate export of download data files to QSS grid/MS applications
- User settings (options) for enhanced productivity
- Fully supports Payroll/Absence Tracking/ Comment data with appropriate security
- SSN can be secured

Personnel Downloader (PDL) Security Settings

See the Module, Task and User Security (MTUS) manual, section 5.32, for information on security settings for PDL. These settings allow you to:

- specify the files and data that users can select
- block access to downloading SSNs
- allow downloading SSNs and data from one or more categories (PD, PH, AB, CO, PR)

Personnel Downloader (PDL) Security Settings

Table 5-16: PDL010 USERSEC parameters for the DOWNLOAD module

COL	CONTROLS	DESCRIPTION
01	Not used	Leave blank.
02	Download files to view on the Data tab	<p>0 The user can view data files that are not otherwise restricted by the Download Definition. For example, the user cannot view files flagged as "Private" (default).</p> <p>1 Users can view only the data files that they have created.</p> <p>2 The user can view all available data files, including those flagged as "Private."</p>
03	Categories that user can update	<p>0 No update (default). This setting blocks the ability to change district and global categories.</p> <p>1 Ability to change district categories only.</p> <p>2 Ability to change district and global categories.</p>
04 - 60	Not used	Leave blank

Personnel Downloader (PDL) Security Settings

Table 5-17: PDLDEF USERSEC parameters for the DOWNLOAD module

COL	CONTROLS	DESCRIPTION
01	Whether to apply the PDLSEC user security	<p>N No (default). Users have access to downloading SSNs. They do not have access to the following categories of data: PD Screen Data, Payroll History, Absence Transactions, Employee Comments, and PR Screen Data. The system ignores the PDLSEC user security record.</p> <p>Y Yes. Block access to downloading the SSN. Define the PDLSEC user security to control access to the SSN and categories of data.</p>
02 - 60	Not used	Leave blank

Personnel Downloader (PDL) Security Settings

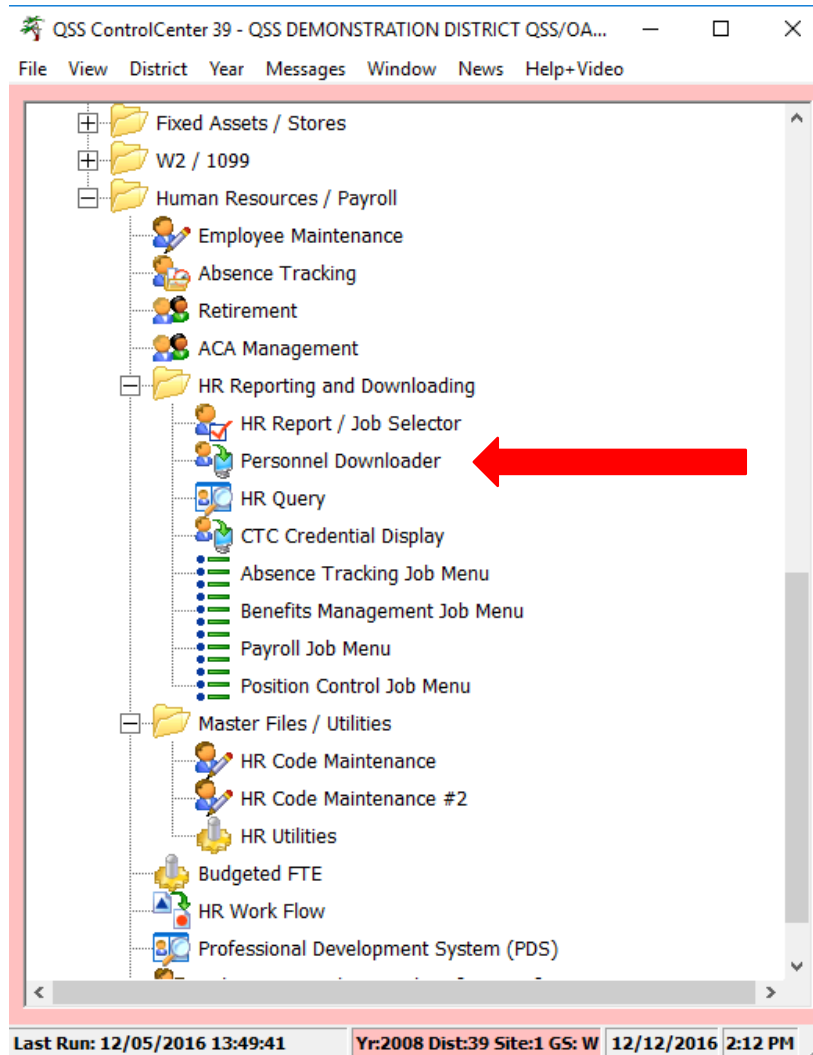

Table 5-18: PDLSEC USERSEC parameters for the DOWNLOAD module

COL	CONTROLS	DESCRIPTION
01 - 60	Access to SSNs and categories on the <u>F</u> ield Selection subtab	<p>Type up to 30 codes. Columns 01 - 02 are the first code, 03 - 04 the second, 05 - 06 the third, and so on.</p> <p>SSAllow downloading the SSN.</p> <p>PDAllow access to the fields in the PD Screen Data category.</p> <p>PHAllow access to fields in the Payroll History category.</p> <p>ABAllow access to fields in the Absence Transactions category.</p> <p>COAllow access to fields in the Employee Comments category.</p> <p>PRAllow access to fields in the PR Screen Data category.</p> <p>NOTE: These categories always display in the Categories list. If you do not allow access to them, nothing displays in the Field column after you click a category.</p>

Personnel Downloader (PDL) Global Categories

Category	Description
PERSONNL	PERSONNEL
GMJ2	Testing Category
JL	JEFF'S GLOBAL CATEGORY for fun
GLELSAMP	GLOBAL SAMPLE FOR DOCUMENTATION
SAMPLE	Sample for Documentation
CAT10	Originally the 10th Category
11	11
12	12
14	14

- Maintenance security controlled
- Used in Global Definitions
- All districts have access

Personnel Downloader (PDL) Using the “@” Sign with Categories

- Putting the @ sign at the end of a category name (as in this example):

Payroll@

allows PDL to download data that is blank.

- Without the @ sign, each field selected must have data in order to be reported.

Personnel Downloader (PDL)

Using the “@” Sign with Categories

For example, if you want a report that shows all employees and their degree:

- With an @ in the Category name, all employees will show up and the degree data can be blank.
- Without an @ in the Category name, only employees with degree data will appear on the report.
