Quintessential School Systems provides administrative software and consulting services for the K-12 education market. Our QSS/OASIS product line includes integrated modules that cover the gamut of school business needs, including accounts payable, accounts receivable, benefits management, budget development, employee absence tracking, financial reports, fixed assets, general ledger, human resources reporting, payroll, personnel, position control, purchasing, retirement, warehouse/inventory, and state & federal reporting.

QSS/OASIS includes robust customer-configurable security controls and a full-featured report management system. QSS/OASIS presents the school district end-user with a rich GUI interface, employing both client-server and web-based architectures running on servers available from a variety of top-tier computer hardware vendors. Â ***QSS*** also provides developer tools for the HP e3000 computer system.

QSS was founded in 1990 by five partners who had already accumulated over 80 years of combined experience providing data processing solutions for public school districts.

With a skilled staff focused on the public school market,
QSS
is uniquely qualified to provide quality solutions for your school business computing needs.

The
QSS
corporate offices are located in San Carlos, California, with expert staff working from offices in various locations in California, Oregon, Texas and Taiwan.
